

21B LEAF SPRING SUSPENSION

The 21B is the most versatile, longest lasting suspension system designed specifically for the Heavy Duty market. Available in a wide variety of axle configurations, mounting heights, axle spacing and connection options, the Reyco Granning 21B is the best choice when trouble free performance is required for the long haul.

21B Cast

21B Fab

Features

- Standard long-life rubber bushings or optional poly bushings available. No metal to metal contact assures long life with little maintenance
- No Hop available to prevent axle bounce
- Cast steel axle clamp group
- Cast ductile torque arm ends
- Austempered Ductile Iron equalizers for lighter weight and extra long life

Specifications

- Single, Tandem, Tridem, Quad, Quint, and more axle configurations
- Flangemount, weld-on, and bolt-on hangers available
- GAWR (gross axle weight ratings) of 18,000 - 26,000 lbs. per axle
- Mounting heights range from 3" - 18"
- Axle spreads available from 42" - 109"
