For accuracy, please check nut size with a socket wrench.

Wheel-Checks come in various sizes to fit your nuts

NOTE: New high temperature Wheel-Checks are orange in colour and can withstand temperatures up to 450° and are used in the transit industry. Call for more details.
NOTE: Wheel-Checks are reusable.

WHEEL-CHECK®

THE LOOSE WHEEL-NUT INDICATOR

To the folks at Wheel-Check...

Although I am not a driver by profession, my wife and I are regular travelers on the roads and highways of Ontario. During the past several months, I have been noticing your product on the wheels of buses, delivery vans and transport trucks, but only today did I go looking for your site on the web.

I wish to offer my heartfelt thanks for the fact that you are making and selling this product. The saying "You don't know what you've got 'til it's gone" could be paraphrased into "You don't know how many accidents that never happened were prevented."

I thank you...and I'm sure all the other people out there who aren't going to be hit by rogue truck wheels thank you too.
